

E-commerce at it's best

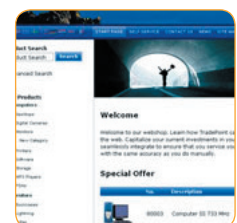

TradePoint is a revolutionary way of working with global e-commerce in both small companies and large corporations. Thanks to the real-time integration with the company's business system TradePoint is a dynamic solution that requires no extra programming and no special hardware or software set-ups.

Installation is simple and the system is easy to scale. The customized design plus the dynamic language, currency and tax settings gives you the power to create a tailor-made individual solution for your customers. TradePoint webpages are even search engine optimized to get top ranking with major search engines like Google™.

Furthermore, TradePoint includes mobile business with easy ordering on the fly. Your customers' sales force can use mobile phones or PDA's and still have the advantages of immediate update of prices and inventory. Check the back page for technical details and contact your ScriptServer partner for further details.
